

Connecting Classrooms to Careers
www.ignitededucation.org

Summer Fellowship Program

Play a key role in giving teachers knowledge and experience to create a future-ready workforce.

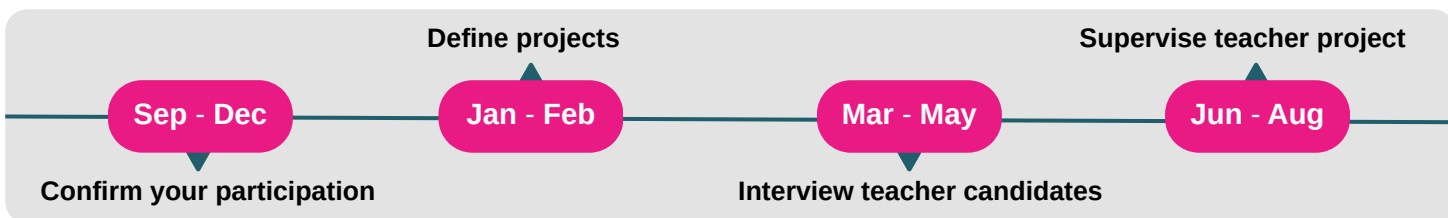

How it works: Host a teacher fellow to work with your team for 8 weeks (35hrs/wk, remote, hybrid or in person). You define the project and we identify qualified candidates. Curriculum coaches guide teachers to develop lessons that bring their experience back to the classroom, helping students envision themselves having a future career in your industry.

Program Cost: \$25K, of that \$9,800 direct to teacher.

	Western Digital	Meta	amazon
Example Project <i>Provided by the organization</i>	Develop AI-powered training tools for technicians.	Test temperature swings on lithium ion batteries in smart glasses.	Build AI-driven heat map of employee expertise to streamline collaboration.

Student Experience <i>Designed by the teacher</i>	Disassemble a hard disk drive to analyze data security and vulnerabilities.	Graph and present real battery testing data as an intro unit to data analysis.	Demystify generative AI through risk analysis, practice prompts, and discussion.
